Jacques-Louis David

1748-1825, FRENCH

David blurred the boundaries between life and art. He lived himself in the turbulent era of the French Revolution and the Napoleonic era, while acting as a leading figure in the Neoclassical movement.

IN CONTEXT Neoclassicism and Pompeii

During the neoclassical period, artists looked to the ruins of ancient Rome and Greece for inspiration. These two cities, which had been destroyed by the eruption of Vesuvius in 79 CE, were excavated in 1738 and 1748 respectively. They had been remarkably well preserved, and the discovery of their ruins led to a renewed interest in classical art and architecture.

SATYR WITH WINE SACK, POMPEII

SELF-PORTRAIT, 1794

This portrait was painted while David was imprisoned following the death of his political allies. The artist's expression and clenched grip reflect his agitated state.
